EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Eugene Mar on April 17, 2002.

Substitute lines 2-6 on page 2 with the following: ✓

A1 The primary purpose of the invention is to provide a lampshade having its upper and lower rings pivoted in conjunction with a support frame positioned between the upper and lower rings. The support frame together with the upper and lower rings stretch out the main portion of the lampshade made of soft and flexible material.

Allowable Subject Matter

2. Claims 1-4 are allowed.
3. The following is an examiner's statement of reasons for allowance:

9

A

The lamp shade folding structure disclosed by the applicant generally comprises the following features:

- A shade made of soft material fixed to an upper ring and lower ring of the lamp shade folding structure;
- A support frame positioned between the upper ring and the lower ring, and stretching the soft material in to a conic cape ;
- A mounting hub positioned at the center of the upper ring, and connecting the shade to the to a light fixture ; and
- A plurality of radial links connecting the hub and the outer circumference of the upper ring.

The above-indicated lampshade folding structure disclosed by the applicant is known in the art. However, the prior art of record fails to show or suggest the applicant's invention as claimed. Specifically, the prior art of record does not disclose proper motivation for combining the following features:

- The lower ring of the lamp shade folding structure comprising two semi-circular rings connected by at least two pivoting devices as recited in claim 1.

The combination of the above-indicated features including a lower ring comprising two semi-circular rings makes this disclosure unique. This feature – segmenting the bottom ring divided in two parts produces overall reduction of the packing needed for transportation of the lampshade.

Neither combined nor individual teaching of Shih et al. (U.S. Patent No. 6,357,897 B1), Long (U.S. Patent No. 6,315,434 B1) and Barnes (U.S. Patent No.

A large, stylized handwritten signature in black ink, located in the bottom right corner of the page. The signature appears to be a single, continuous stroke forming a large 'A' or similar shape.

5,375,048 B1) discloses a lamp shade folding structure comprising two semi-circular rings connected by at least two pivoting devices.

Claims 2-4 are necessarily allowed because of their dependency on the allowed base claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
